Weather Key Points

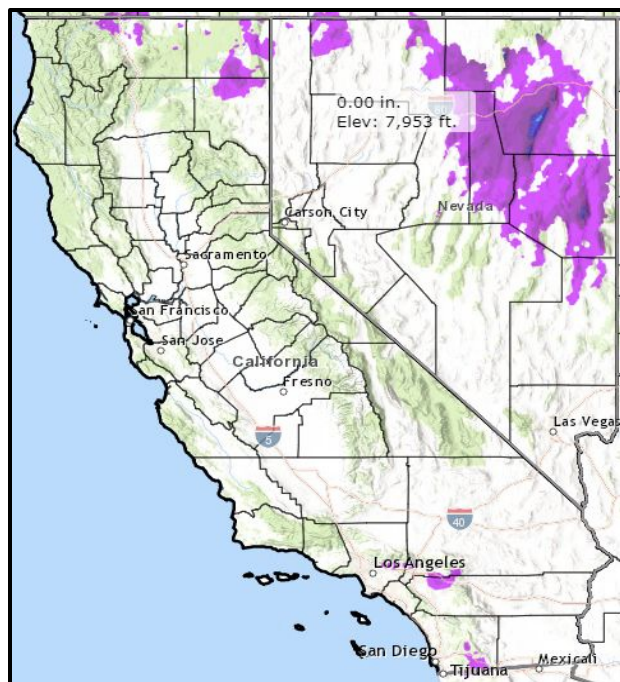

Regional Operations Center

Western Region

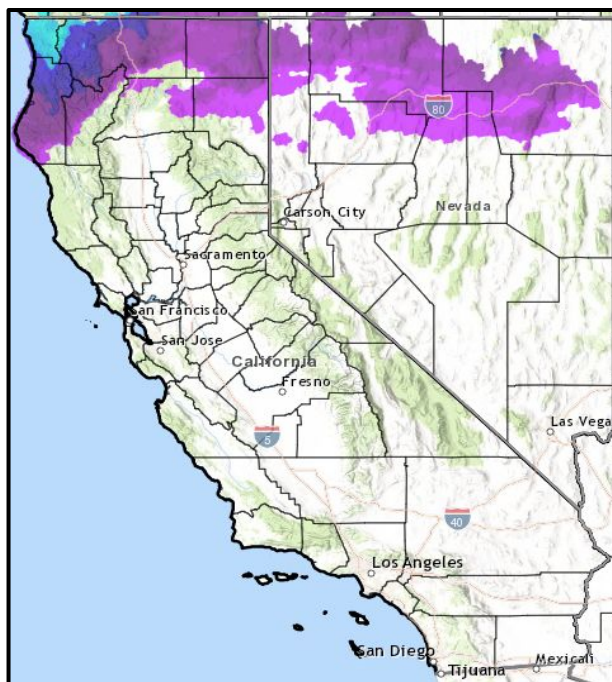

Sunday, October 23

- Breezy north to northeast winds gusting up to 35 mph will bring elevated fire weather conditions to the Sacramento Valley, East Bay, and interior North Bay areas through early Sunday evening
- Additional elevated fire weather conditions will also develop across the southern California mountains as well as southern Santa Barbara County, the Santa Clarita and San Fernando Valleys and eastern Ventura County and much of Los Angeles County Sunday night and Monday as north to northeast winds gust 35 to locally 50 mph
- Some light rain and high elevation snow (mainly above 8,500 feet) will return to far northern California Monday, continuing at times through early Wednesday. Some precipitation could also develop over the Sierra, though confidence remains low.
 - Any precipitation amounts will be light, mainly less than one-quarter inch
 - No widespread or significant impacts are currently expected with this precipitation
- Some gusty offshore winds could redevelop by late week across the Sacramento Valley and southern California, though critical fire weather conditions are not expected at this time

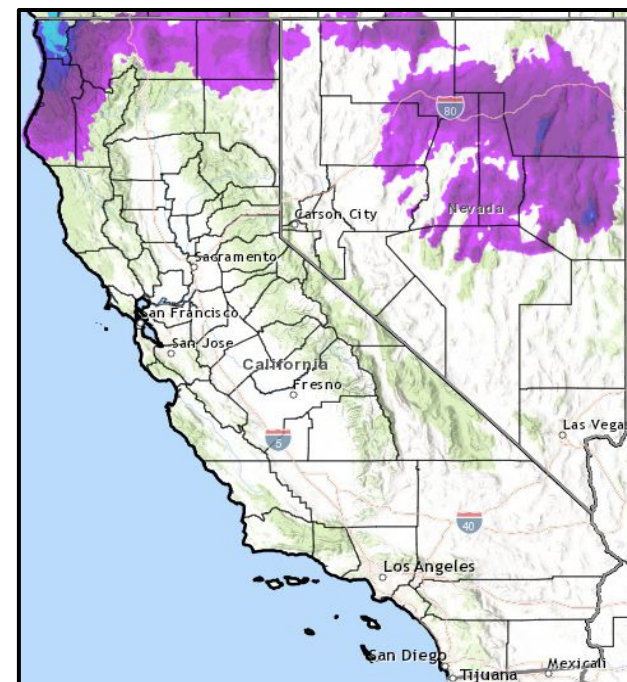

Precipitation Forecast

Sunday

Monday

Tuesday

Important Note: Forecast precipitation amounts are an average for any particular location. Thunderstorms will produce locally much higher rainfall amounts.

Precipitation (inches)

Weather Outlook (6-14 Days)

Regional Operations Center
Western Region
Sunday, October 23

6-10 Day Outlook (October 28 – November 1)

Temperatures

- Below normal temperatures are favored statewide

Precipitation

- Above normal precipitation is favored for the northern two-thirds of the state, with near normal precipitation favored over southern California

8-14 Day Outlook (October 30 – November 5)

Temperatures

- Near normal temperatures are favored again statewide

Precipitation

- Above normal precipitation is favored over much of the state, with the exception of far southern California where near normal precipitation is favored

Risk Assessment Matrix

Regional Operations Center

Western Region

Sunday, October 23

Impact Level Definition

- Impactful weather is not expected.**
- Potential threat to lives and property if no/incorrect actions are taken.**
 - Localized impacts on commerce possible.
 - Includes events that occur frequently.
- Potential threat to lives and property if no/incorrect actions are taken.**
 - Impacts on commerce possible.
 - Includes events that occur a few times per year.
- Actions likely needed to save lives and/or property.**
 - Significant impacts to commerce possible.
 - Includes events that occur infrequently.
- Actions required to save lives and/or property.**
 - Significant and extended impacts to commerce.
 - Includes exceptionally rare events.
